

X-90

The exciting world of the new Suzuki X-90

The Suzuki X-90 is an entirely new vehicle with singular avantgarde styling, which creates a completely new market of its own. The X-90 combines the exciting driving experience of a two-seater with T-top and the advantages of a compact, four-wheel drive vehicle. In the X-90 you experience whatever open-air feeling you wish: in the closed X-90, due to the generous glass roof, you are seated as in open air. A simple lever mechanism can be used to provide a comfortable convertible feeling by removing the glass roof of the T-top and storing it in a luggage compartment box.

The Suzuki X-90 is one for all. In the city its outstanding manoeuvrability is captivating; on long trips it rides comfortably and, on rough roads, its engageable four-wheel drive ensures you can always depend on getting through.

Fashionable, functional interior fittings

The X-90 interior fittings are functional and comfortable. Seats and door trim are covered with fashionable, multicoloured

textiles and create a cosy atmosphere in the interior. The high seating position guarantees a commanding view. Ergonomic bucket seats ensure comfortable driving pleasure even on long trips.

The latest technology

The 1.6-litre 4-cylinder 16-valve engine with multipoint injection gets you along briskly in the city, provides endurance on the motorways and flexibility on rough roads. From the driver's seat, a transfer lever can be operated to change from rear-wheel drive to four-wheel drive, whatever you require. For the Suzuki X-90, you can also choose between a 5-speed manual transmission and an electronically controlled 4-speed automatic transmission.

Drive with enthusiasm and arrive safely

Standard safety equipment for the Suzuki X-90 includes full-size dual airbags, side impact beams, rear spoiler with integral high mounted stop lamp and height adjustable seatbelt anchorage. Antilock Braking System (ABS) is available as an option. As an advanced antitheft measure, the X-90 features an electronic immobilizer system.

Specifications Suzuki X-90

Maximum output	71 kW (97 PS)
Maximum speed	
– Manual transmission	150 km/h
– Automatic transmission	140 km/h
Fuel consumption (80/1268/EEC*)	
Manual transmission	
– Urban mode	9.0 litre/100 km
– Constant 90 km/h	6.9 litre/100 km
– Constant 120 km/h	10.9 litre/100 km
Automatic transmission	
– Urban mode	10.7 litre/100 km
– Constant 90 km/h	6.9 litre/100 km
– Constant 120 km/h	9.9 litre/100 km
Dimensions	
Overall length	3,710 mm
Overall width	1,695 mm
Overall height	1,555 mm
Wheelbase	2,200 mm
Luggage volume (VDA)	
– without glass roof	237 litre
– with stored glass roof	178 litre

*80/1268/EEC: The given fuel consumption values are determined by standardized testing methods. According to the way of driving, street and traffic conditions, environmental factors and vehicle condition, fuel consumption values will differ from values determined by standardized testing methods.
