

**MITSUBISHI
PAJERO PININ**

GDI ENGINE. THE RESPONSIBLE SOLUTION

The Pajero Pinin is the first SUV in the European market to be equipped with Mitsubishi's revolutionary, environmentally thoughtful GDI (Gasoline Direct Injection) engine. The GDI which powers the Pajero Pinin is a highly efficient, 1.8-litre, direct injection petrol engine which significantly reduces both fuel consumption and CO₂ emissions. Remarkably, the GDI engine achieves all this without any loss of power, making it the ideal engine for urban driving while supplying all the power required for off-road trekking.

THE COMPACT AND SPORTY NEW

pininfarina

CITY-SIZE REFINEMENT

THE OFF-ROADER COMES TO TOWN! THIS INTERPRETATION OF THE PAJERO PININ IS A COMPACT, STYLISH AND COSMOPOLITAN VEHICLE DESIGNED TO LOOK GREAT AND FEEL GOOD IN URBAN ENVIRONMENTS EVERYWHERE.

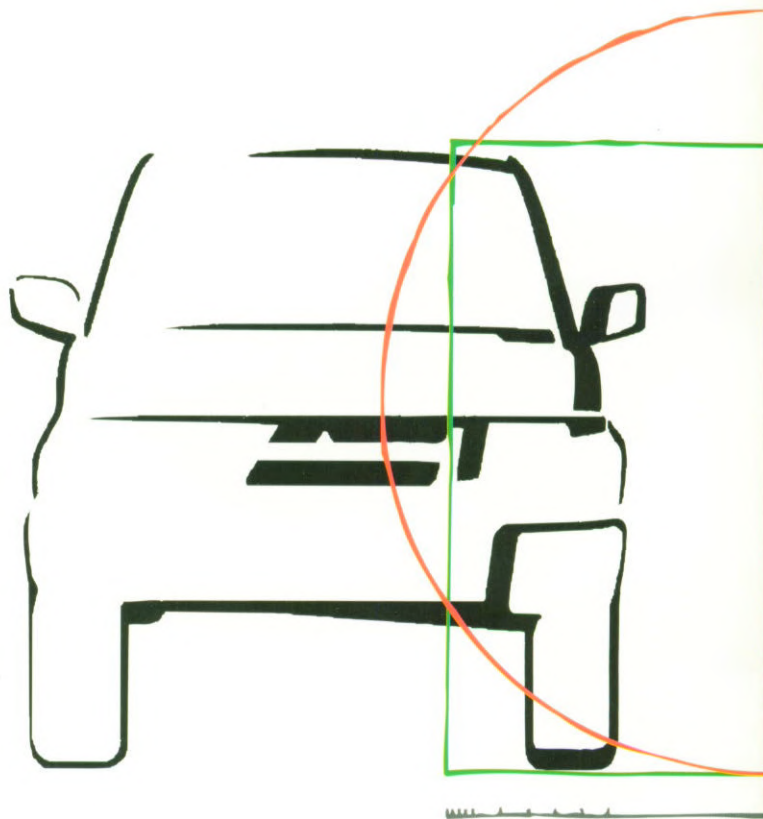

DESIGNED TO THE LAST DETAIL

The inspired and inimitable Pininfarina influence is not restricted to the Pajero Pinin's exterior. Because the interior, too, has been styled by Pininfarina with colours and upholstery materials chosen to reflect a chic and urban lifestyle. The same high degree of aesthetics extends to every detail of the interior panel displays, and to all switches and controls. A carefully thought-out overall design, meanwhile, ensures enhanced visibility and optimum space utility.

THE NEW-CONCEPT URBAN 4WD

MITSUBISHI PAJERO PININ

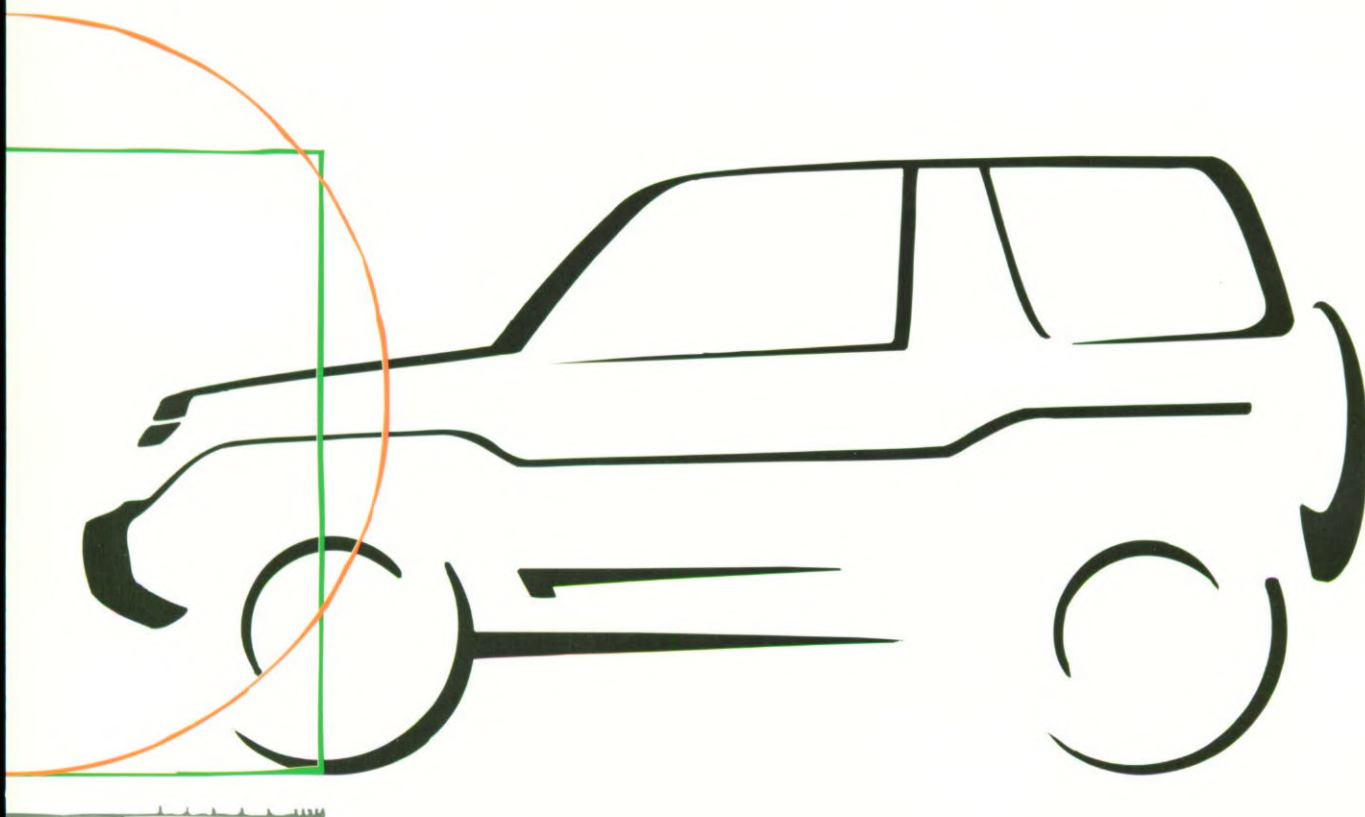

THE COMPACT SUV FOR OFF-ROAD AND IN-TOWN

The Pajero Pinin represents a new concept – a rugged and true 4WD off-roader blessed with styling designed to grace any urban environment. Dynamically efficient and compact on the outside, the

Pajero Pinin's interior is refined to a degree that will make off-road riding as comfortable as on-road cruising. Functional and affordable, recreational and inspirational, the Pajero Pinin is the 4WD vehicle you can take anywhere.

BUILDING UPON THE PAJERO HERITAGE

The Pajero Pinin builds on the established heritage of the renowned Mitsubishi Pajero. Time and time again, Mitsubishi's advanced 4WD technology took the Pajero to victory in ultra-testing rallies such as the Paris-Dakar. This level of success helped the Pajero range (including the Pajero Sport) to become one of the world's best loved off-landers. And now the Pajero Pinin brings you the benefit of all that 4WD know-how and experience, in the unique form of the new-generation, new-concept Pajero Pinin.

FINISHING TOUCHES BY PININFARINA

pininfarina

No wonder the Pajero Pinin looks fantastic – it's been styled by none other than the Italian Masters, Pininfarina. They took a close look at both the inside and the outside of the vehicle and gave it a look to please the eye of the most style-conscious travellers. And we're pleased to add that Pininfarina's involvement is much more than skin deep because the Pajero Pinin will be produced at Pininfarina's new plant at Bairo Canavese in Italy.

THE ANYTIME, ANYWHERE NAVIGATION SYSTEM

The Pajero Pinin is equipped with an extremely clever colour LCD Navigation System. It is able to offer the driver essential assistance thanks to its multiple functions and data storage capacity. With its Nav Tech database and GPS antenna, the system uses friendly voice prompts and an easy-to-follow on-screen arrow to guide and direct the driver. It adds up to a function which can be very useful when you're in a strange town - and absolutely essential when you're off-road in strange new territories.

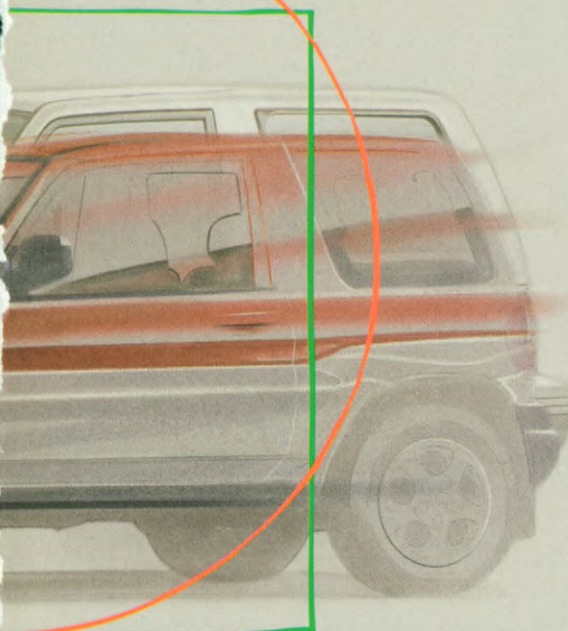

EXPLORING THE INTERIOR

The more traditional off-road interpretation of the Pajero Pinin has a more aggressive overall look. The interior reflects this with graphics, paintwork, and upholstery specifically chosen to convey the vehicle's spirit of adventure.

OFF-ROAD EXCITEMENT

SMART BUT UNCOMPROMISING! THIS INTERPRETATION OF THE PAJERO PININ WILL SATISFY ADVENTUROUS OFF-ROAD DRIVERS WITH ITS AGGRESSIVE STYLING AND ALL-TERRAIN CAPABILITIES.

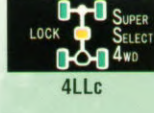

PININ

MEMBER OF THE PAJERO FAMILY

4WD BASED ON THE SUPER SELECT

The Pajero built its worldwide reputation on the outstanding Mitsubishi Super Select 4WD system. So, when Mitsubishi's engineers wanted to develop an easy-to-use, part-time 4WD system for the Pajero Pinin they simply, and ingeniously, refined the Super

Select system. The result is the new, all-terrain SS4-i system. Switching between the four modes (including two off-road modes) can be done effortlessly and 'on-the-fly.' Once more, Mitsubishi has redefined 4WD technology!
