## Find Your Own Space.

Personal space. Private space. Practical space. Whether you're looking for a car with enough room to accommodate your family and their luggage. Or a practical car that's fun to drive and easy to park, you'll find just what you're looking for in the new Mitsubishi Spacestar.

# The 5-Star Concept from Mitsubishi

## *Compact Space.*

Spacestar's shorter, raised body makes it manoeuvrable enough to squeeze into the tightest spaces.

## *Maximum Space.*

Room enough for 5 passengers, space enough for lots and lots of luggage.

## *Economical Space.*

Enjoy space between fill-ups, the 1.8ℓ GDI™ engine lowers fuel consumption, and CO<sub>2</sub> emissions with no loss of power.

## *Space for Driving Enjoyment.*

Despite being highly functional, the Spacestar's punchy acceleration and responsive handling make it a joy to drive.

## *Safe Space.*

Peace of mind comes as standard with active and passive safety features for both driver and passengers.

## Power and Performance that doesn't Cost the Earth.

Mitsubishi's new Spacestar comes luxuriously well equipped and with state-of-the-art safety features as standard. There's also a choice of two engines, a 1.3ℓ or the remarkable new 1.8ℓ Gasoline Direct Injection (GDI™) engine.

An engine which combines the acceleration, power and responsiveness of petrol with the fuel economy of diesel. And because GDI™ burns less fuel it produces less CO<sub>2</sub>, Mitsubishi's new car concept is particularly considerate to the wide open space of the great outdoors as well as our pollution plagued cities. All of which makes the Spacestar the perfect car for every environment.

*Economical Space.*

*Driving Enjoyment.*

*Safe Space.*

## Compact, Semi-Tall Profile.

Mitsubishi's new Spacestar combines the spaciousness of an MPV with the manoeuvrability of a 5-door hatchback. It's compact on the outside and huge on the inside. By raising the Spacestar's profile 100mm above a 'standard' height and adding a wealth of space enhancing features to the interior, Mitsubishi's new concept really is a star among cars. Add to this its fresh, dynamic, sporty styling and the Spacestar offers both form and function.

sliding rear seats  
fully backward

folding system

## Maximum Space Utility.

Appearances can be deceptive and the Mitsubishi Spacestar's lean, flowing lines and compact dimensions belie its spaciousness and versatility. For example, the Spacestar can comfortably seat three people (and most of their belongings) in the rear. Slide the rear seats back for plenty of legroom and passenger space. Slide them forward for a vast amount of luggage room. They can even be folded completely flat if desired.

.....It's

the

little

things

that

make

Mitsubishi

great.
